

PRECIMETER

Molten metal level control

Actuator Service Adapter

Actuator Service Adapter

The service adapter enables easy connection to any Precimeter actuator in a workshop or in operation. It is a useful tool for commissioning, testing, troubleshooting and/or service work. The adapter has a switch for "Local/Remote" – control, "Emergency Closing" , "Calibrate to Close", a switch to enable "1/0/Remote Control" of the actuator, and a "4–20mA potentiometer"

for adjusting the actuator arm position. It also has test/measuring terminals for analog 4–20mA and indications of "Power", "Emergency Close Loaded" and "Temp OK".

A communication cable with M12 connector and a RS–232 to USB–adapter is included to connect through a PC using a terminal software for actuator parameter access.
